Description

Southern Cross Energy was created in response to the need for clients to access more cost-effective options for their oil and gas drilling and service needs.
Offering well design and engineering, directional drilling, project management, drilling optimisation, and equipment procurement services, the team at Southern Cross Energy design, procure, and implement a range of solutions.
Our engagement options are highly flexible - from one-off project services, to long term project support, Southern Cross Energy delivers bespoke solutions to address the unique challenges and goals for each project.
